**PCD2.K521**

Terminator adapter for I/O modules with ribbon connection

34-pin ribbon connector at the PCD end
Process end 2 × 10 screw terminals 0.5…1.5 mm²
PCD2.K521 with LEDs (source operation)

Pre-assembled system cables and terminal adapter modules support the fast integration of the Saia PCD® I/O modules into the switch cabinet. I/O modules with ribbon connections, in particular, can be installed quickly and easily in the switch cabinet. The modules with terminals can also be connected to the adapters using traditional stranded wires. The adapters either are available for galvanic separation of the outputs with relays or as simple I/O adapters with voltage distribution.

To facilitate and speed up the installation of controllers, various adapters are available that can be connected direct to the Saia PCD® I/O modules via system cables.

I/O modules and I/O terminal blocks may only be plugged in and removed when the Saia PCD® and the external +24 V are disconnected from the power supply.
