
SAIA® PCD Commercial Information 2002-13

Update information about the PCS1

Murten, 31st July 2002

Dear Ladies and Gentlemen

Please find enclosed the newest information regarding our COMPACT Controller PCS1. The following points are mentioned in this information.

Availability	<u>1</u>
Documentation	<u>2</u>
Known Problems in Software	<u>3</u>
Known Problems in Firmware	<u>4</u>

1. Availability

Until now, all promised PCS1 are delivered! We are still having problems with the industrialisation. The 400 units, which are in production now, will allow us to deliver soon normally this product.

2. Documentation

You will find as enclosure following documents:

The technical information “DDC Compact – the compact style of building automation” is available from stock

- German (26/345 D1)
- English (26/345 E1)
- French (26/345 F1)

Press Release “ DDC Compact - the neatest alternative for intelligent building automation“

- Press55d_PCS1
- Press55e_PCS1

Package insert of PCS1, which is always in the package

- Beipackzettel PCS1.pdf

Saia-Burgess Controls Ltd.

3. Known Problems in Software

We found a little bug in Analogue Library PG5 SP 110.
PCS1.W3 analogue input! The FBox were reading 0 value under special program structure.
 We fixed this bug in the analogue library version SP 130, which is available on www.sbc-support.ch.
 In August 2002 we will officialise the PG5 SP130, which contains the new analogue library.

4. Known Problems in Firmware

As we informed in the “**add on paper**” with the last delivery of the PCS, the FW Version **\$8b** and **\$8e** contained still some little bugs. We distributed in the “**Communication 02062, restrictions with PCS1.C8xx firmware version \$8b**” this kind of information. But we want to make sure, that you got all the information about the different FW versions.

“**add-on paper**” See appendix to that mail.
 See also [Version Overview PCS1.XLS](#)

You can also find all information on:
www.sbc-support.ch

We will distribute an Firmware update in August 2002, so that you can bring the PCS1 to a final state.

This information gives you an overview about the actual situation with the PCS1 and we hope that the problems in the past 6 weeks didn't cause too many problems to your customers.

We have now a good product available and please don't hesitate to ask for technical or commercial support to bring the product to the market.

Kind regards,

Head of Technical Marketing Group
